The Lee Company – IMH Group RoHS / WEEE / ELV Declaration

Dear Valued Customer,

The European Union's RoHS Directive (Directive 2011/65/EU, Amended by Directive EU 2015/863) is related to the regulation of Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (Cr+6), flame retardants (PBB and PBDE), and phthalates (DEHP, BBP, DBP, and DIBP) in electrical and electronic equipment. The European Union's WEEE Directive (Directive 2002/96/EC) is related to the collection, treatment, recycling, and recovery of, electrical and electronic equipment. None of the products supplied by The Lee Company IMH Group are electrical or electronic.

The European Union's End of Life Vehicle Directive (Directive 2000/53/EC) aims at making the dismantling and recycling of end of life vehicles more environmentally friendly, which includes the regulation of hazardous substances. The IMH Group is not involved with the dismantling or recycling of end of life vehicles.

The IMH Group recognizes that some of its customers use IMH Group products in electrical equipment and on vehicles and therefore is providing this declaration for RoHS, WEEE and ELV. Products produced by the IMH Group, with the exception noted below, are free of the hazardous substances that are listed in ANNEX II of RoHS and Article 4(2)(a) of ELV. This applies to all IMH Group products **EXCEPT the 6000 Series Betaplugs (sizes 6mm, 7mm, and 8mm only)**.

Additionally, IMH Group products are compliant with Directive 2003/11/EC (pentaBDE or octaBDE). These chemicals are polybrominated diphenyl ethers (PBDE), which are included in the restricted substance list of the RoHS Directive.

Best Regards,

Nick Sorvillo
Quality Assurance Manager
